Proteins encoded by the eps operon function in exopolysaccharide (BPS) synthesis. The operon is useful for producing chimeric eps operons, for optimising production of EPS in lactic acid bacteria. EPS impart texture, mouth feel and rheological properties to fermented food products (e.g. yoghurt). They function as thickeners, to provide free-flowing and creamy texture, and may also have biological activities beneficial to health
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               nucleic acid fragments containing exopolysaccharide operon, useful for increasing exopolysacchride synthesis in lactic acid bacteria.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      The present sequence is an eps operon from Streptococcus thermophilus. Proteins encoded by the eps operon function in expolygasccharide (EPS) synthesis. The operon is useful for producing chimeric eps operons, for optimising production of EPS in lactic acid bacteria. EPS impart texture, mouth feel and theological properties to fermented food products (e.g. yoghurt). They function as thickners, to provide free-flowing and creamy texture, and may also have biological activities beneficial to health
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     New nucleic acid fragments containing exopolysaccharide operon, useful e.g. for increasing exopolysacchride synthesis in lactic acid bacteria

Proteins encoded by the eps operon function in exopolysaccharide (BES) synthesis. The operon is useful for producing chimeric eps operons, for optimising production of EPS in lactic acid bacceria. EPS impart texture, mouth feel and rheological properties to fermented food products (e.g. yoghurt). They function as thickeners, to provide free-flowing and creamy texture, and may also have biological activities beneficial to health
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    nucleic acid fragments containing exopolysaccharide operon, useful for increasing exopolysacchride synthesis in lactic acid bacteria

Proteins encoded by the eps operon function in exopolysaccharide (EPS) synthesis. The operon is useful for producing chimeric eps operons, for optimising production of EPS in lactic acid bacteria. EPS impart texture, mouth feel and rheological properties to fermented food products (e.g. yoghurt). They function as thickeners, to provide free-flowing and creamy texture, and may also have biological activities beneficial to health
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       bacteria
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                New nucleic acid fragments containing exopolysaccharide operon, useful e.g. for increasing exopolysacchride synthesis in lactic acid bacteria

                                                                                                                                                                                  5939
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      The present sequence is an eps operon from Streptococcus thermophilus. Proteins encoded by the eps operon function in exopolysaccharide (EPS) synthesis. The operon is useful for producing chimeric eps operons, for optimising production of EPS in lactic acid bacteria. EPS impart texture, mouth feel and rheological properties to fermented food products (e.g. yoghurt). They function as thickeners, to provide free-flowing and creamy texture, and may also have biological activities beneficial to health
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       New nucleic acid fragments containing exopolysaccharide operon, useful e.g. for increasing exopolysacchride synthesis in lactic acid bacteria.
                                                                                                                                                                                                                                                                                                                                                                                                              product;

Proteins encoded by the eps operon function in expolysaccharide (ERS) synthesis. The operon is useful for producing chimeric eps operons, for optimising production of EPS in lactic acid bacteria. EPS impart texture, mouth feel and theological properties to fermented food products (e.g. yoghurt). They function as thickeners, to provide free-flowing and texture, and may also have biological activities beneficial to health
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             New nucleic acid fragments containing exopolysaccharide operon, useful e.g. for increasing exopolysacchride synthesis in lactic acid bacteria

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     The present sequence is an eps operon from Streptococcus thermophilus. Proteins encoded by the eps operon function in exopolysaccharide (EPS) synchhesis. The operon is useful for producing chimeric eps operons, for optimising production of EPS in lactic acid bacteria. EPS impart texture, mouth feel and theological properties to fermented food products (e.g. yoghurt). They function as thickeners, to provide free-flowing and creamy texture, and may also have biological activities beneficial to health
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            TATTTTGCATTTTTTATATCTCGTATGCCAGTTGAATTTGAGTATAGAGGTAATCTGATA 182
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                New nucleic acid fragments containing exopolysaccharide operon, useful e.g. for increasing exopolysacchride synthesis in lactic acid bacteria.

Sequence 3, Application US/09900038A
; Patent No. 6828128
; Fatent No. 6828128
; GENERAL INFORMATION:
    APPLICANT: Miyake, Katsuhide
; APPLICANT: Miyake, Katsuhide
; APPLICANT: Iljima, Shinji
; APPLICANT: Iljima, Shinji
; TITLE OF INVENTION: Beta 1,3-galactosyltransferase and DNA encoding the same
; TILE REFERENCE: 766.53
; CURRENT APPLICATION NUMBER: US/09/900,038A
; CURRENT APPLICATION NUMBER: US 2001-09-21
; PRIOR APLICATION NUMBER: JP 2001-392
; RIOR FILING DATE: 2001-01-05
; NUMBER OF SEQ ID NOS: 8
; SOFTWARE: PatentIn Ver. 2.0
; SEQ ID NO 3
: LENGTH: 6865

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           qq
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ઠે
                                                                  Patent No. 002070.2

GENERAL INFORMATION:
APPLICANT: Lynn Doucette-Stamm et al.
APPLICANT: Lynn Doucette-Stamm et al.
TITLE OF INVENTION: Nucleic Acid and Amino Acid Sequences Relating to Streptococcus
TITLE OF INVENTION: Pneumoniae for Diagnostics and Therapeutics
FILE OF INVENTION: Pheumoniae for Diagnostics and Therapeutics
FILE OF INVENTION: Pheumoniae for Diagnostics and Therapeutics
FILE OF INVENTION: NUMBER: US 09/953,110
CURRENT APPLICATION NUMBER: US 09/107,433
PRIOR FILING DATE: 1998-06-30
PRIOR FILING DATE: 1998-05-12
PRIOR APPLICATION NUMBER: US 60/085,131
PRIOR FILING DATE: 1998-05-12
